## Security & Access Control Checklist

---

Document Date: 2026-02-24

Prepared for: Management Review Meeting

Prepared by: IT / Development Team

### How to use this document:

Each table shows **CURRENT** permissions in green/red columns, and has **yellow "NEW" columns** for you to write your desired changes.

### For each row:

- If current permissions are OK: write nothing in yellow columns (keeps current).
- If you want to change: fill the yellow NEW columns with **Y** (yes) or **N** (no).

- Use the "**Notes**" column for any comments or conditions.

**Legend:**

**YES** = Permission currently GRANTED | **NO** = Permission currently DENIED | **[ ]** = Empty field for YOUR decision

---

# Table of Contents

- 1. Groups Documentation & Configuration**
- 2. Model Access Rights (Current + New Decision)**
- 3. Cross-Reference Matrix: Models x Groups**
- 4. Record Rules (Row-Level Security)**
- 5. Sensitive Fields & Access Decisions**
- 6. Views Inventory & Field-Level Groups**
- 7. Recommendations & Action Items**
- 8. Meeting Notes & Sign-off**

**Modules Covered:** 57 custom addons

# 1. Groups Documentation & Configuration

Complete documentation of each security group. Review the purpose, inherited groups, and menu access. Use the **yellow columns** to write changes.

## Module: auditlog 9 group(s)

Property	Current Value	Change To (fill if needed)
Group XML ID	group_auditlog_user	
Display Name	Auditlog User	New name: _____
Category	security_auditlog_groups	New category: _____
Inherits From	None	Add: _____ Remove: _____
Menu Access	None	Add: _____ Remove: _____
Decision		[ ] Keep [ ] Remove [ ] Merge with: _____

### 3. Cross-Reference Matrix: Models x Groups

This matrix shows ALL models (rows) vs ALL groups (columns). Each cell shows the current CRUD as **RWCD** letters. Below each cell is an editable line for your desired change.

**Matrix (Groups 1-5 of 27)**

## 7. Recommendations & Action Items

#	Priority	Issue	Recommended Action	Decision	Notes
1	CRITICAL	Unify Security Groups Many modules use generic Odoo groups (base.group_user, hr.group_hr_manager) instead of SamaLink's 5 groups. Users may bypass SamaLink restrictions.	Map all modules to SamaLink groups (Employee, Manager, Administrator, HR Officer, Accountant).	[ ] Approve [ ] Reject [ ] Modify	
2	CRITICAL	Over-Permissive oh_appraisal oh_appraisal gives FULL CRUD to base.group_user -- every user can create/delete appraisals.	Restrict Create/Delete to HR. Employees read their own only.	[ ] Approve [ ] Reject [ ] Modify	
3	CRITICAL	hr_reminder Blocks All Access hr_reminder sets (0,0,0,0) for base.group_user. Employees cannot see reminders.	Grant Read (1,0,0,0) to Employee group.	[ ] Approve [ ] Reject [ ] Modify	
4	HIGH	Missing Record Rules hr_custody, hr_mission, ohrms_loan, hr_resignation have NO record rules. Users can see ALL records including other employees' data.	Add rules: Employees=own, Managers=team, HR=all.	[ ] Approve [ ] Reject [ ] Modify	
5	HIGH	Payslip Line Rules Commented Out Record rules for hr.payslip.line are commented out. Any employee can see all salary details.	Uncomment and activate payslip line record rules.	[ ] Approve [ ] Reject [ ] Modify	
6	HIGH	Field-Level Access Missing Sensitive fields (salary, bank, passport) lack groups attributes. Any user with model read can see ALL fields.	Add groups='...' to sensitive fields in views.	[ ] Approve [ ] Reject [ ] Modify	
7	MEDIUM	Consolidate Module Groups hr_mission, hr_work_location_transfer, hr_attendance_deviation define own group hierarchies.	Make module groups inherit from SamaLink groups via implied_ids.	[ ] Approve [ ] Reject [ ] Modify	
8	MEDIUM	Menu Access Audit Verify no sensitive menus (payroll, system settings) visible to wrong groups.	Audit whitelisted_menu_ids and remove inappropriate entries.	[ ] Approve [ ] Reject [ ] Modify
